
Digital Transformation and Innovation For the Future of Educational Institutions

1. **It's not Why? But, how:** Updation and Integration of Technology with the academic functioning to be future-ready is the ultimate solution to continue in the global education race.
2. **Digital Transformation:** It is the key to the adoption of technology for efficiency and innovation
3. **Key to Encounter any Crisis:** Let us accept the fact that Digital Transformation was most valuable for institutions to continue during the pandemic and it resulted in excellent 'Take Aways'.
4. **Boon during the Pandemic:** The sudden technological transformation has reaped good results during the pandemic.
5. **Inertia and hesitancy:** In spite of the digital transformation's potential to enhance the values of the teaching-learning processes, there is a hesitancy in adopting it.
6. **Future Readiness:** Institutions are now greatly tempted to adopt innovative methods of Digital Transformation along with the traditional methods. Keeping in view the advantageous they bring to the learning desk.
7. **Enhances skill Set:** It results in enhancing the technological skill set and adds to the professional development of both trainers and the taught.
8. **Fear of the Unknown Investments:** Having understood the fact that digital transformation is crucial to encounter any crisis and come out it successfully, it could be a fear of high monetary expenses in bringing about the transformation that institutions are worried about.
9. **Zero or Minimal Burden on Managements:** Introduce 'Digital Transformation' as a renaissance involving the contributions of all the stake holders to bring about the change and not through revolutionary investments.

Let us discuss further for amicable solutions to the above question...
